

GREEN POLICY

2019

Environmental
Sustainability

Oleant Lighting

We operate in a manner that seeks to minimize environmental impact and ensures an eco-friendly workplace. We act in compliance with relevant legislation and do our best to use good environmental practices in our activities.

WE SHALL

1

Consider environmental aspects and impacts in our activities and decision making processes.

2

Promote environmental awareness, educate colleagues and employees and encourage them to work in a responsible manner.

3

Reduce waste through reuse and recycling. Purchase recycled, recyclable or refurbished products / materials where they are economical and suitable.

4

Promote efficient use of materials and resources in our premises including water, energy and others, particularly those that are non-renewable.

5

Avoid unnecessary use of hazardous materials and products, seek substitutions when feasible, and take all reasonable steps to protect health and the environment.

6

Favor and use environmentally friendly goods and services.

7

Communicate our commitment to partners, stakeholders, suppliers and society and encourage them to support and follow it.

8

Strive to continually improve environmental performance by periodically reviewing and updating our own guidelines in light of technological and other developments.
